INTRODUCTION

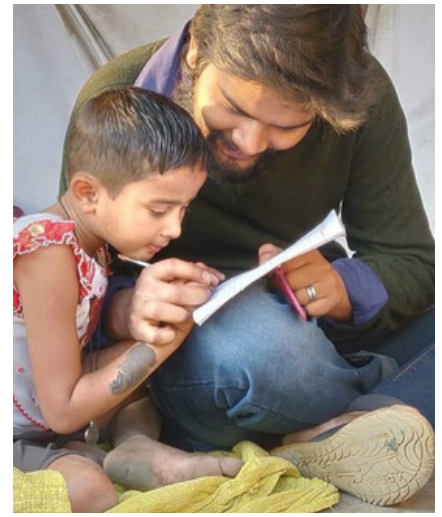

The following is the annual report of our TTF Foundation which has been working tirelessly to provide education to children living in slum areas during the **challenging times of the COVID-19 pandemic**. Despite the unprecedented circumstances, we have remained steadfast in our commitment to ensuring that these children continue to receive quality education. This report highlights our efforts and accomplishments during that critical period.

ABOUT US

Try to Fight Foundation is a Varanasi-based NGO that was founded in 2013 by a group of young people with the objective of fostering social goods by concentrating on sustainable and free educational interventions for underprivileged children. 1000+ underprivileged kids from different social strata have been taught by us so far. Since our establishment, we have tirelessly worked towards bridging the educational gap faced by children residing in underprivileged communities.

FOUNDER MESSAGE

Dear Friends and Supporters,

It is with great pleasure that I welcome you to TTF FOUNDATION'S annual report for the year 2020-21 . I would like to take this opportunity to express my gratitude to all of our supporters who have contributed to our mission of educating children living in slum areas. Your unwavering support has enabled us to make a positive impact on the lives of these children and their families.

Over the past year, our NGO has achieved significant progress towards achieving our mission. We have continued to provide high-quality education to children in slum areas, empowering them with the knowledge and skills necessary to break the cycle of poverty. Our team has worked tirelessly to ensure that our students receive the best possible education despite the challenges posed by the ongoing pandemic.

Despite the pandemic's challenges, our team has been able to implement several initiatives and programs to support our mission. We have increased our enrollment capacity, improved our infrastructure, and enhanced the skills of our teaching staff through regular training programs. We have also strengthened our parental engagement initiatives by organizing workshops and awareness sessions for parents.

In addition, we have established a scholarship program to support academically talented and deserving students from slum areas. We have also introduced vocational training programs to equip older students with practical skills that will enhance their employability, and a health and nutrition program to address the overall well-being of our students.

Our outreach programs have also been successful in raising awareness about the importance of education and promoting the enrollment of children in our school. We have collaborated with other NGOs, educational institutions, and government agencies to leverage resources and expertise to expand our reach and implement innovative educational programs.

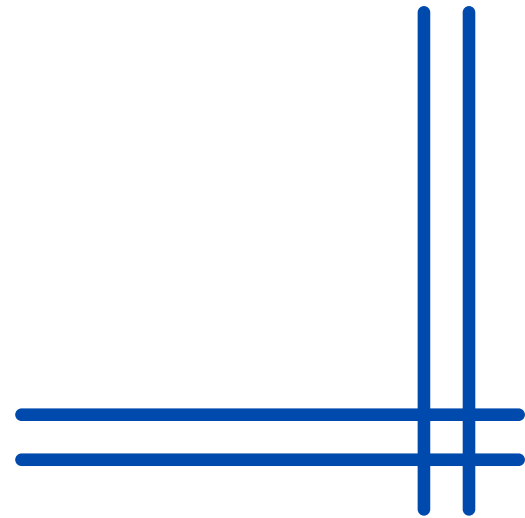

As we look towards the future, we remain committed to our mission of providing quality education to children living in slum areas. We have set both short-term and long-term objectives to further our mission, including establishing multiple educational centers, achieving sustainable funding sources, integrating technology into our teaching methodologies, and empowering the entire community through skill development programs.

I would like to express my gratitude to our team of dedicated professionals, volunteers, and donors who have worked tirelessly to make our mission a success. I would also like to thank our students and their families for entrusting us with their education.

In conclusion, I invite you to read our annual report for a more detailed overview of our activities and achievements during the past year. Thank you for your continued support, and we look forward to your continued partnership as we work towards our vision of a brighter future for children living in slum areas.

Sincerely,

Yajat Dwivedi
Co-Founder and Secretary
TTF FOUNDATION

VISION & MISSION

VISION

Our vision is a world where every child, regardless of their background or circumstances, has access to quality education and the opportunity to thrive. We envision empowered and resilient communities, where slum area children are equipped with the necessary tools to overcome challenges, achieve their dreams, and contribute meaningfully to society.

MISSION

Our mission at TTF Foundation is to provide innovative and transformative education to children living in slum areas. We strive to break the cycle of poverty by equipping these children with the knowledge, skills, and opportunities they need to realize their full potential and create a better future for themselves and their communities.

IMPACT OF THE PANDEMIC (COVID-19)

Disruption of Education Services

The pandemic forced the closure of schools and learning centers, leading to a disruption in the education services we provide. Many slum area children lacked access to remote learning resources, digital devices, and internet connectivity, making it challenging to continue their education during lockdowns.

Increased Vulnerability of Children

Slum area children faced heightened vulnerability during the pandemic. The economic hardships faced by their families, job losses, and limited access to basic necessities placed immense strain on their well-being and hindered their ability to focus on education.

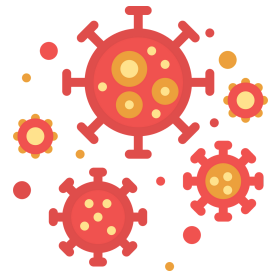

Financial Challenges

The economic impact of the pandemic affected our foundation's financial resources. Donations and funding sources were affected, making it more challenging to sustain and expand our programs. Uncertainty and financial hardships faced by our supporters and donors also impacted their ability to contribute.

EFFORTS DURING PANDEMIC (COVID-19)

HEALTH

Implemented health and sanitization awareness programs to educate communities about COVID-19 prevention measures, including hand hygiene, mask-wearing, and physical distancing. Organized mobile health clinics to provide medical care, check-ups, and essential medications to vulnerable population in slum areas.

EDUCATION

We took learning initiatives to ensure that children in slum areas could continue their education from the safety of their homes. Provided online resources and learning materials to keep students engaged and motivated.

OVERALL

Collaborated with local partners, community leaders, and healthcare providers to extend our reach and maximize the impact of our initiatives. Prioritized the nutritional needs of children by providing nutritious meals, food packages, and supplements.

Remote Learning Initiatives

We swiftly adapted our education programs to remote learning platforms, ensuring that children could continue their education from the safety of their homes. We provided learning materials, online resources, and virtual classes to keep children engaged and motivated.

Access to Technology

Recognizing the digital divide, we worked tirelessly to bridge the gap by providing laptops, tablets, and internet connectivity to students who lacked access to technology. This enabled them to participate in online classes and access educational resources.

Distribution of Learning Materials

In areas where online learning was not feasible, we distributed printed learning materials and activity kits to ensure children could continue their education at home. These materials were designed to be engaging and interactive, promoting self-learning and exploration.

Personalized Support

Our dedicated teachers and volunteers provided one-on-one assistance to students, offering academic support and guidance. They addressed questions, provided feedback, and encouraged students to stay motivated and focused on their studies.

Handwashing Demonstrations

We emphasize the significance of handwashing and demonstrate the correct technique to community members. By showcasing the proper way to wash hands with soap and water, we encourage the adoption of this simple yet powerful habit.

Distribution of Hygiene Kits

We provide hygiene kits containing essential items like soap, sanitizers, face masks, and hand towels to slum area residents. This helps to ensure that they have the necessary tools to maintain personal hygiene and prevent the spread of diseases.

Health Education Sessions

Our team conducts informative sessions on various health topics, including nutrition, common illnesses, and preventive measures. We provide practical tips and advice to help community members make informed decisions about their health and well-being.

Interactive Workshops

We conduct interactive workshops in slum areas, focusing on health and sanitization practices. We engage community members in discussions, demonstrations, and hands-on activities to raise awareness about proper hygiene, disease prevention, and the importance of sanitation.

KEY ACTIVITIES DURING COVID-19

Food distribution

KEY ACTIVITIES DURING COVID-19

Food distribution

KEY ACTIVITIES DURING COVID-19
